## Product Description

# Custom 34 Inch LCD Gaming Screen Monitor Full High-Definition Monitor 4k 75hz Gaming PC Monitor

### Screen Size

The monitor has a diagonal screen size of 34 inches, measured from one corner to the opposite corner. This size offers a larger viewing area than standard monitors, providing a more immersive gaming experience.

### Resolution

The resolution can vary depending on the specific model, but a common resolution for a 34-inch gaming monitor is 3440x1440 pixels. This resolution, known as UltraWide or 21:9 aspect ratio, offers a wider field of view and enhances the visual experience in games and multimedia content.

### Refresh Rate

A 75Hz refresh rate means the monitor can refresh the image on the screen up to 75 times per second. This higher refresh rate results in smoother motion and reduced motion blur, enhancing the overall gaming experience.

### Panel Technology

34-inch gaming monitors typically use In-Plane Switching (IPS) panel. TN panels offer faster response times, which can be advantageous for competitive gaming, while IPS panels provide better color accuracy and wider viewing angles, making them suitable for more visually-oriented gaming experiences.

### Connectivity

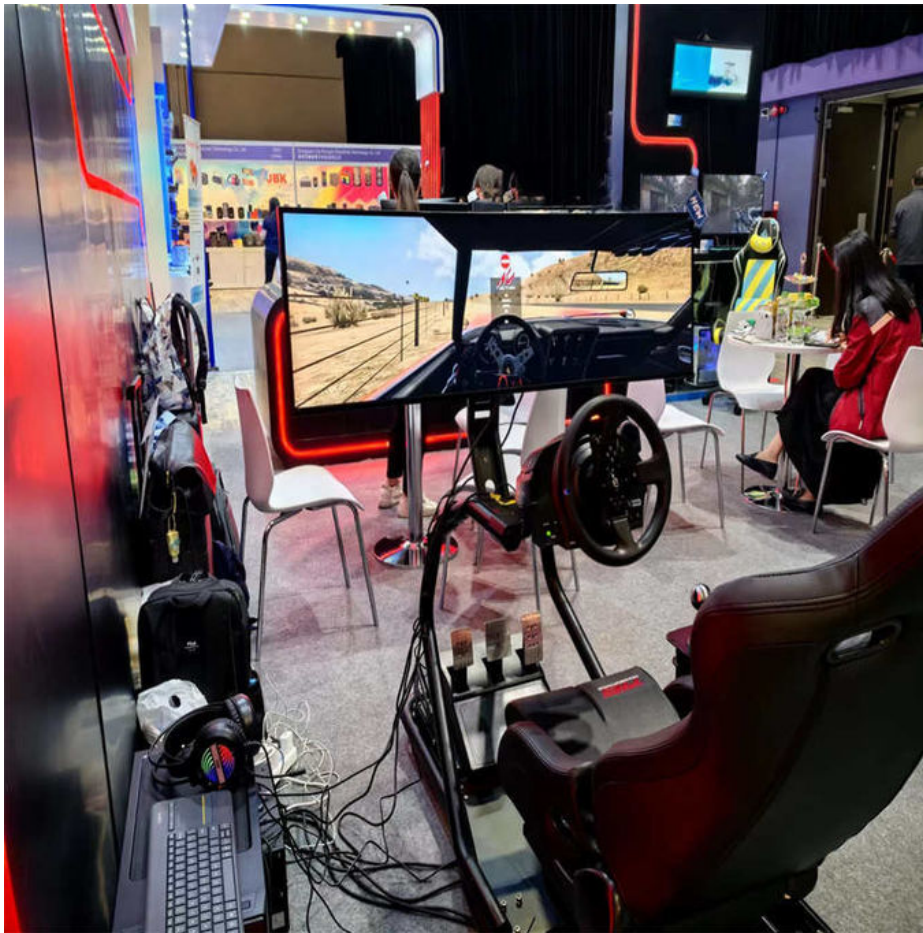

34-inch gaming monitors offer a variety of connectivity options, including HDMI, DisplayPort, and sometimes DVI or VGA ports. These ports allow you to connect the monitor to your gaming PC, console, or other devices.

### Additional Features

34-inch gaming monitors often come with additional features to enhance the gaming experience. These may include adaptive sync technologies like AMD FreeSync or NVIDIA G-Sync, which help reduce screen tearing and stuttering. Some monitors also offer built-in speakers, adjustable stands for ergonomic positioning, and customizable display settings.

It's important to note that the specifications and features of gaming monitors can vary across different models and manufacturers. If you're interested in a specific 34-inch 75Hz gaming monitor, I recommend checking the product page or reviews from reputable sources to gather more detailed information about its specific features, performance, and user experiences.

34-inch Gaming Monitor	
Brand	OEM/ODM
Product Color	Black
Backlight source	LCD
Screen size	34-inch Gaming Monitor
Screen proportion	21:9
Backlight	CCFL
Resolution	4k
Brightness	300cd/m2

	Working humidity: -10 to 70°C
	Save temperature: -10 to 70°C
	Save humidity: -10 to 70°C
Power supply	110V-240V -DC12V
	electricity: 5A
	Machine power consumption: 25-45W

## FAQ

**Q: How can I get the price?**

A: We usually give you a quotation within 24 hours after receiving the inquiry (except weekends and holidays), if you need a quotation urgently, you can contact us by mail or other means.

**Q: What is the minimum order?**

A: Our company mainly deals in wholesale business, but if you insist on buying one, or you only need one set, we will also deliver the goods to you.

**Q: Can I buy a prototype to test before buying in bulk?**

A: Yes, please feel free to contact us.

**Q: What payment methods do you accept?**

A: Our company supports most payment methods, but usually accepts T/T, PayPal.

**Q: What are your shipping methods?**

A: We support sea, air, rail transportation, and express delivery, and also support customers to use their own logistics forwarders. Please confirm with us before placing an order.

**Q: I would like to ask you if it's possible to have my logo on the product.**

A: Yes, we support OEM and special customization, so we can design, produce, and process according to customer's requirements. Of course, custom logos on the box and instruction manual are also included.

**Q: What is your delivery time?**

A: It depends on your order quantity and order season. Usually, small quantities will be shipped within 5 to 15 days, and large quantities will be delivered within about 30 days. All in all, the delivery time will not exceed the time agreed between us and the buyer.
