Product Description

Factory Custom 40 Inch LED LCD Monitor 165Hz FHD IPS Panel 21:9 4K Gaming PC Monitor

High Resolution

The 3440x1440 resolution provides a high level of detail and sharpness on the 40-inch screen. This resolution is ideal for tasks that require ample screen real estate, such as productivity work, content creation, and immersive gaming experiences.

Ultra-Wide Aspect Ratio

With a 21:9 aspect ratio, this monitor offers an immersive and panoramic viewing experience. The wider screen allows for enhanced multitasking, improved productivity, and a more cinematic feel when watching movies or playing games.

High Refresh Rate

The 165Hz refresh rate ensures smooth and fluid motion on the screen. This high refresh rate reduces motion blur, provides a more responsive experience, and delivers smoother gameplay, particularly in fast-paced action games.

Fast Response Time

With a response time of typically 3-4 milliseconds (ms), this monitor minimizes ghosting and motion blur, resulting in sharper and clearer images, particularly during fast-moving scenes in games or videos.

Wide Color Gamut

The gaming monitor typically covers a wide color gamut, such as sRGB or Adobe RGB, resulting in accurate and vibrant colors. This feature is beneficial for tasks that require color accuracy, such as photo editing, graphic design, and video editing.
