Product Description

OEM 15 Inch Touch Screen Monitor With Stand Plastic Shell IPS Panel For POS

Responsive Touch Technology

The capacitive touch technology allows for quick and accurate touch responses, making interactions smooth and effortless.

Display Size

The touch monitor has a 15-inch screen size, measured diagonally from one corner to another. This size offers a balance between portability and visibility, making it suitable for various applications, including point-of-sale systems, kiosks, interactive displays, and more.

Resolution

The resolution of 1024x768 means that the display consists of 1024 pixels horizontally and 768 pixels vertically. While it might not provide the same level of detail as higher-resolution monitors, it is still capable of delivering clear and readable content.

Connectivity

The 15 inch touch monitor typically comes with various connectivity options to connect it to different devices. This may include VGA, HDMI, or DisplayPort inputs, allowing it to be used with computers, laptops, gaming consoles, media players, or other compatible devices.

Compatibility

The 15 inch touch monitor is designed to be compatible with different operating systems, such as Windows, Linux, and Android. This ensures broad compatibility and ease of integration with various devices and software applications.

Additional Features

Depending on the specific model and manufacturer, the 15 inch touch monitor may offer additional features. These can include built-in speakers, USB ports for peripheral connectivity, VESA mount compatibility for easy installation, and other value-added functionalities.

Versatile Connectivity

With multiple connectivity options such as HDMI, VGA, and USB, the 15 inch touch screen monitor can easily be integrated with a variety of devices for enhanced functionality.

Adjustable Stand

The 15 inch touch screen monitor comes with an adjustable stand that allows users to tilt the screen for a comfortable viewing angle, enhancing usability and ergonomics.
