Product Description

The Ultimate Display: 49-inch 5K 165Hz Monitor

In today's world, where high-performance displays are essential for gaming, content creation, and professional tasks, the 49-inch 5K 165Hz monitor stands out as a powerhouse of technology. With its ultra-wide resolution, fast refresh rate, and immersive design, it provides an unmatched experience for users who demand both quality and efficiency.

Immersive 5K Ultra-Wide Resolution

One of the most remarkable features of this monitor is its 5120×1440 resolution, which delivers stunning clarity and vivid colors. The 32:9 ultra-wide aspect ratio offers the same screen real estate as two 27-inch 1440p monitors placed side by side, eliminating the need for dual screens. This makes multitasking seamless, as users can work with multiple windows open simultaneously.

165Hz Refresh Rate: Smooth and Responsive

A 165Hz refresh rate is a game-changer for gamers and professionals alike. Unlike standard 60Hz or 120Hz displays, a 165Hz monitor refreshes frames at a much higher rate, resulting in smoother motion and reduced input lag. This is particularly beneficial for competitive gaming, where fast reaction times are crucial.

Gaming-Specific Features

The 165hz curved gaming monitor may include gaming-specific features such as customizable crosshairs, game presets, and on-screen overlays. These features help optimize your gaming experience by providing visual aids and quick access to settings, allowing you to fine-tune the display to your preferences.

Eye Care Technologies

The 49-inch curved gaming monitor incorporates eye care technologies to reduce eye strain during long gaming sessions. These features may include flicker-free backlighting and low blue light filters, which help minimize eye fatigue and provide a more comfortable viewing experience.

49-inch 75hz Curved Gaming Monitor	
Brand	OEM/ODM
Product Color	Black
Backlight source	LED
Screen size	49 inch 165hz Curved Gaming Monitor
Screen proportion	21:9
